PROFILE

U.S. Coast Guard veteran and WGU cloud and network engineering student with CompTIA A+ and Network+ certifications. Built and secured an AWS portfolio website using S3, CloudFront and Origin Access Control. Brings shipboard command center experience in radar monitoring, radio operations and watchstander qualification assessment to an entry-level cloud or technical support role.

CERTIFICATIONS

CompTIA A+ | October 2026 • CompTIA Network+ | July 2026

TECHNICAL SKILLS

AWS: S3, CloudFront, OAC, IAM users and groups, MFA, AWS Budgets
Web and tools: HTML/CSS basics, GitHub web workflows, deployment documentation
Foundations: Networking and hardware fundamentals; personal PC component selection and assembly

CLOUD PROJECT

AWS Portfolio Website | Personal Project 2026

- Deployed an HTML/CSS portfolio to a private S3 bucket and delivered it through CloudFront using HTTPS and index.html as the default root object.
- Configured OAC and verified that the site loads through CloudFront while anonymous requests to the direct S3 object URL return Access Denied.
- Published updates through GitHub and S3; tested CloudFront cache invalidation and documented deployment, security checks and cleanup procedures.

PROFESSIONAL EXPERIENCE

Delivery Driver | Uber Eats Feb 2020 - Present

Honolulu, HI and San Diego, CA

- Picked up restaurant orders and delivered meals to customers across Honolulu and San Diego using the Uber Eats platform.

Operations Specialist Third Class | U.S. Coast Guard Jun 2016 - Jan 2020

USCGC Sherman and USCGC Midgett

- Performed command center watchstanding duties, including radar monitoring, navigation support, radio operations and radio security upkeep during cutter patrols.
- Administered watchstander qualification boards and tests for newly arriving Operations Specialists aboard Midgett before they were cleared to stand watch.
- Supported Sherman’s decommissioning and served on Midgett’s pre-commissioning crew, including a two-month assignment in Pascagoula, Mississippi.
- Earned shipboard Damage Control qualification covering response to fires, flooding and other emergencies affecting vessel safety.

EDUCATION

Western Governors University

Bachelor of Science, Cloud and Network Engineering - Amazon Web Services
In progress since May 2025 | Expected graduation: November 2028
